

Matt Dumford

Below are the results of testing my UDP client for homework 2. All tests were done from my local computer and with the same files. Tests showed that the time it took to send a file increased linearly relative to the size of the file. The time it took to send a file also increased with the distance the file had to travel.

File Size	Chicago to Virginia (seconds)	Chicago to Tokyo (seconds)
1B	0	0.1
512k	3	27
1M	7	52
5M	34	262
10M	70	525
